SUMMARY

I am a **Full-Stack (MERN) Web Developer** with 5+ years of experience in designing and developing web applications using a variety of technologies. My expertise includes front-end development using modern frameworks such as **React and Next JS**, as well as back-end development using **Node.js and Express** (integrated in Next JS). I have experience working with databases such as **MySQL and MongoDB** and have implemented **RESTful APIs** to integrate web applications with third-party services. My expertise includes HTML, CSS, JavaScript, Node JS, React JS and Next JS, Express, MongoDB and Figma. I am committed to delivering high-quality, scalable, and maintainable code and am passionate about staying up-to-date with the latest technologies and industry trends.

EDUCATION

2023

High School (+2) | Science Stream

Gyanodaya Secondary School, Kathmandu

Additional Subject: Computer Science

WHAT'S CODING FOR ME?

Coding is more than just a hobby for me, it's a creative outlet that allows me to turn ideas into reality. I love the feeling of bringing a project to life through code and watching it come to fruition. Whether it's building a website, creating a mobile app, or tinkering with new technologies, coding is my passion and my favourite way to spend my free time.
